

Hello Mr Lubaszewski,

No the intent is not to stop what you are doing or shut you down. The intent is to make everyone aware that we all have to wear a face covering when we can't social distance. Coaches, players and spectators should adhere to the State guidance available here: <https://commerce.maryland.gov/Documents/BusinessResource/Youth-Sports-COVID-19-Best-Practices.pdf>. Coaches, players, and spectators should wear a mask until they enter the field of play and follow social distancing guidelines whenever possible. If you, your staff, and players all wear a face covering when you can, social distance as much as possible, this will help all be safe and stay healthy.

Don

Comments	I have been informed about the latest order requiring masks in outdoor places. I read the order and I am trying to understand it. If I read it the way it is written I cannot comprehend its message. In #1 it states that masks are required when outdoors in public places when maintaining 6' physical distancing. Shouldn't that say "when NOT maintaining 6' physical distancing"? I am attempting to understand the order so that I can relay the correct information to the wide base of my customers that are affected outside of my business. I run a baseball training facility and I am in contact with the baseball community on a daily basis. As written, this order effectively shuts down baseball in AA County. Maybe that isn't what you intended. Maybe it is. Please clarify. Thank you for your anticipated reply.
